“ Bud may have had some personal issues that made life hard at times, but he was a good man inside. I remember when I was in high school and working on my science fair project, A research project on the 2nd toe being bigger then the big toe. Bud always thought I was a bit wacky. I had waited until the night before the project was due to get my project all together. I needed something creative for my display. Well, Bud was artistic and good at doing carpentry work too. I gave him my idea of a big foot cut out of a board as my backdrop for my display. Bud went right to work making the big foot with the 2nd toe bigger to compliment my research. We had fun painting and putting it up. Bud didn't gripe much either. It definitely stood out at the science fair, and my title was "Be My Tootsie"! Thank you Bud for sharing your talents and for being a helpful brother in law to me during my science project; it meant a lot to me! May your soul rest in peace!
